The Currents of Lethal Violence-N. Prabha Unnithan 1994-09-27

Building on past work, the authors outline an integrated model for linking suicide and homicide and show how that research from this perspective can further our understanding of violence. Specifically, they show that research based on this model provides new insights into how structural and cultural factors combine to produce high homicide levels in the American South and cross-national difference in lethal violence rates. In conclusion, they evaluate the

model's utility, address possible criticisms of this perspective, and suggest avenues for further investigations of lethal violence.

**Forgotten Calculus**-Barbara Lee Bleau 1994

This highly useful text-workbook is an ideal teach-yourself refresher volume, if you are a business person engaged in economics or in other business situations. It also makes a fine supplementary text if you are a student enrolled in a calculus course. And if you are an adult who has never studied calculus but now feel the need for it, here is an excellent introduction to the subject. Each work unit offers clear instruction and worked-out examples. Topics covered include functions and their graphs, derivatives, optimization problems, exponential and logarithmic functions, integration, and partial derivatives.
